Ron	U of Wisconsin	Medium	RS	MR	R	Yellow
Shelby 427	SDSU	Medium	S	MR	R	White
Deon	U of MN	Late	MR	MS	MR	Yellow
Hayden	SDSU	Late	MS	MS	MR	White
Leggett	AAFC	Late	MS	MS	S	White
Rockford	NDSU	Late	S	MR	R	White
Beach	NDSU	Late	MS	MR	MS	White
CS Camden	Lantmannen SW Seed	Late	MS	S	MS	White

R - Resistant

MR - Moderately Resistant

MS - Moderately Susceptible

S - Susceptible

At the time of publication, it is believed that the varieties listed above, combined with good agronomic characteristics and management, should provide the best opportunity for growers to produce food quality oats. Before purchasing or planting oat varieties not listed, please contact Grain Millers to discuss attributes of other varieties considered.

Grain Millers recommends the frequent scouting of oats fields for both insects and plant diseases from early in the growing season through heading. If leaf fungal diseases are seen, the timely application of registered and approved fungicides for non-organically grown oats is approved and recommended to enhance both yield and grain quality potential. Contact Grain Millers for more information.

Please contact Crop Improvement Associations or Grain Millers for descriptions or more information on varieties.
