

Viking Custom Soybean Treatments for 2011

Acceleron 1 – Custom Applied Only

(Acceleron Fungicide)

- Acceleron 1 contains two fungicides to provide excellent control of Pythium, Fusarium, Phytophthora, and Rhizoctonia
- Provides improved plant health due to rapid emergence under colder soil conditions
- \$6 per Unit (140,000 Seeds or 50 lb. Unit)
- Treated seed cannot be returned
- Seed and treatment must be paid in full before treatment
- 40-unit minimum

Acceleron 2 – Custom Applied Only

(Acceleron™ Insecticide/Fungicide + Excalibre™ + N-Hibit™)

Total seed protection

- Acceleron 2 contains two fungicides and an insecticide to complement Genuity™ Roundup Ready 2 Yield® soybeans
- Excalibre™ encapsulated inoculant is the only inoculant with a unique blend of three highly effective proprietary strains of bacteria for a wide range of variable soil and planting conditions and can be applied up to 120 days before planting
- N-Hibit™ is a growth stimulator that enhances a plant's own growth systems and natural defense mechanisms
- Increases plant stands, uniformity, vigor, speed to canopy and yield
- Field tests have shown as much as a 10-14 bushel/acre yield advantage
- \$12 per Unit (140,000 Seeds or 50 lb. Unit)
- Treated seed cannot be returned
- Seed and treatment must be paid in full before treatment
- 40-unit minimum

ProfitCoat™ Soybean Seed Treatment – Custom Applied

Wrap your seed with Nutrients, Energy, and Disease Protection

- Complete Biologically-Enhanced Nutrient Package
- Enhances root growth and yield potential
- No need for multiple trips and applications
- Nutrients right on the seed
- Better yields with less fertilizers and higher profits
- Easier and improved plantability
- Order directly from ProfitPro
- Call ProfitPro for more information: 888-875-2425
- If you purchase your seed from us, we are happy to ship your seed to ProfitPro for free

NOTE:

Custom seed treatments must be ordered and pre-paid a minimum of two weeks before expected pick-up date.

Albert Lea Seed also carries the following planter box soybean treatments:

Cell Tech Liquid Inoculant – Planter Box

- Dual strains for improved early season nodulation
- Two billion Rhizobia per gram
- Sterile liquid formulation offers maximum nitrogen-fixing potential for increased yields
- Use on-seed or in-furrow for greater flexibility
- Works in all types of planters and conservation tillage systems
- Won't blow off in air seeders

Graph-Ex Soybean Inoculant and Seed Lubricant – Planter Box

- Blend of Talc, Graphite, and Excalibre Inoculant
- Call for pricing and sizes available

N-Dure Peat-Based Soybean Inoculant – Planter Box

- Call for pricing and sizes available
